Live outside the box

In a hectic world, Gloster lets you create an environment that is not confined by walls, but defined by a sense of personal space, an oasis of peace, relaxation and freedom.

View the outside as an extension of your home, an expression of your individual style, every bit as important as any other room in the house, and then furnish it with beautiful things.

And remember, outside is a far tougher environment than inside, so accept nothing but the best. Gloster

Manufacturing

Gloster furniture is selected by the most demanding customers who insist on the best and so we believe that we have to be the very best in all that we do - starting with the manufacturing.

Gloster has its own factory near Surabaya in Java, Indonesia which we started over 20 years ago. Here we use both traditional and modern methods to achieve production standards that usually well exceed those of most other indoor and outdoor furniture manufacturers. The factory is located close to the teak plantations, is run by a European management team and employs over 800 people.

In addition to teak, Gloster is expert in the use of a variety of materials for the manufacture of our furniture. Extensive use is made of stainless steel, powder coated aluminium, man-made wicker and sling material and there are specialist departments within the factory entirely devoted to the working of these materials to the same high standards as our teak components.

We also work in partnership with a few select manufacturers who have specialist skills and techniques that we do not have in our own manufacturing plant. These factories have been chosen because of their ability to produce the highest quality consistent with our standards.

Every piece of Gloster furniture is manufactured to our high standards by skilled furniture makers and each item is hand finished to guarantee years of service in demanding conditions.

Teak & The Environment

Teak trees are not indigenous to Indonesia but climatic conditions on Java are ideal for growing teak. Teak was originally introduced to the islands by Buddhist monks, some 700 years ago. When the Dutch colonised Indonesia in the 19th Century, they soon realised the opportunity to establish large plantations and introduced the plantation management systems that are still in use today.

Teak plantations are really no different than any other crop, except that the growing cycle is far longer. Within the plantations, the trees are continuously cared for by the local population and over their lifetime the trees are regularly pruned and the integrity of the plantations carefully maintained. This ultimately results in a better quality of timber - healthier wood, straighter grain and with less knots. Ideal for use in outdoor furniture.

We work continually with the managers of the government owned plantations and other interested parties to ensure that everything to do with our use of Teak is environmentally correct and that all our manufacturing activities follow good environmental practices for the benefit of both our people and the local communities.

Design

Of course, great manufacturing is wasted without great design. Gloster currently works with several world-renown designers to create timeless, elegant furniture.

John Caldwell

The John Caldwell Design Company has successfully expanded in its own right from the first commercial design sold by John at the age of 19. Always interested in using the latest light-weight, durable, and easy to clean materials for his outdoor lines, John Caldwell currently enjoys a successful, long term relationship with Gloster.

Mark Gabbertas

Mark Gabbertas is an award winning furniture designer based in London. An intrinsic part of Marks design process is the belief that at all times, the design of an object is governed by an appreciation of commercial realities. He believes passionately that if a great design does not sell, perhaps it is not such a great design.

Povl Eskildsen

Povl began gathering furniture design & production knowledge over two decades ago whilst working in his father's furniture factory. Having furthered a significantly 'hands-on' early interest in furniture design, Povl studied and graduated in furniture design from the School of Architecture in Aarhus, Denmark in 1986.

Edi & Paulo Ciani

These two Italian brothers form a formidable design team. Edi graduated as a technical interior and furnishing designer, while his brother Paolo also studied for a master in industrial design at the Fashion Institute of Technology in New York. In 1992 the two brothers began the activity of the associated Paolo and Edi Ciani office.

Gloster Around the World

Testament to our philosophy of creating beautiful and practical furniture of the highest standard, look closely and you will find Gloster's quality and comfort in many exclusive resorts around the world. From unique boutiques to large independents, from hotel chains to cruise liners. All have one thing in common - Gloster.

Kukio Resort - Hawaii

innovation, style

Outdoor Lounge

is the ultimate expression of the outdoor living trend. Pioneered and perfected by Gloster, the combination of innovative design and robust cushion technology offers indoor style and comfort with the performance of a fully outdoor product.

As with all the best ideas, simplicity is the key with highly modular seating units providing the building blocks for each collection. This simplicity allows a wide number of different units to integrate together to create almost limitless design possibilities.

Metal

furniture, whether from stainless steel or aluminium is the modern choice for those seeking practicality, style and comfort.

We generally manufacture using 304 grade stainless steel with a brushed finish - the industry standard for outdoor products. Many items are also available with a durable, electropolished finish which further enhances corrosion resistance.

Exceptionally strong in comparison to their weight, our aluminium collections all feature a tough and easy to maintain, powder coat finish.

Teak

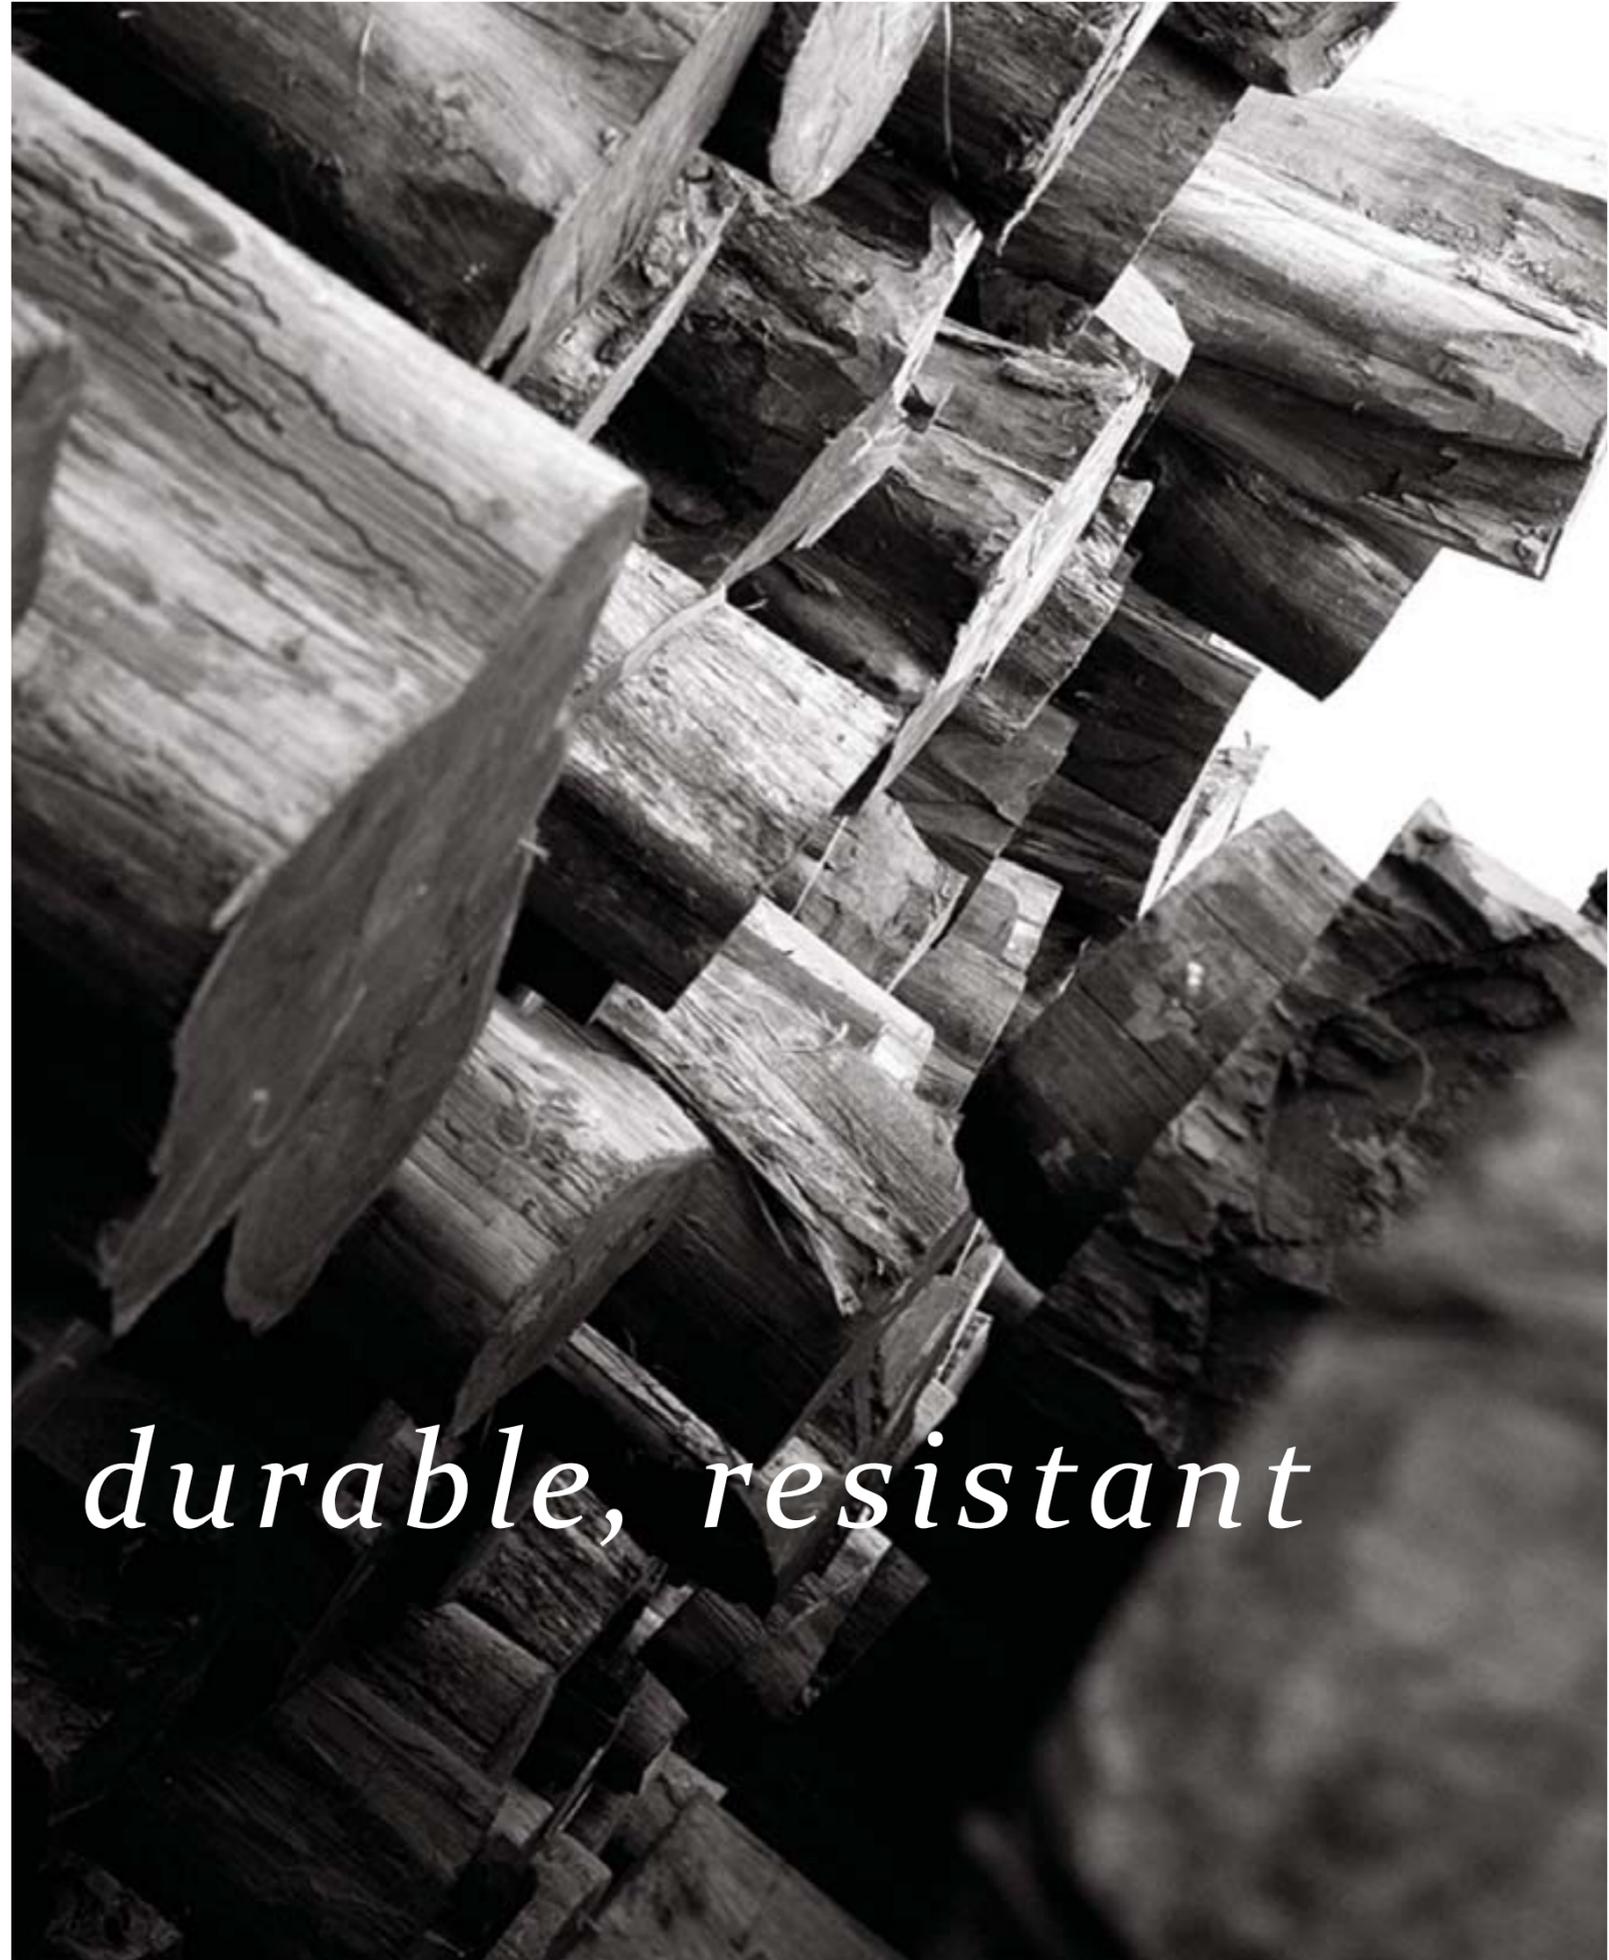

Teak is a beautiful golden brown, close-grained hardwood with a high natural oil content. Exceptionally hard wearing, highly resistant to rotting and almost impervious to the effects of sun, rain, frost or snow, teak is the first choice timber for outdoor furniture.

Every piece of teak we use originates from plantations. About 80% of this is from government owned plantations on the Indonesian island of Java and the balance from FSC certified plantations outside Indonesia.

Although not indigenous to Indonesia, its climatic conditions are ideal for growing teak which was originally introduced to the islands by Buddhist monks, some 700 years ago. When the Dutch colonized Indonesia in the 19th Century, they established large teak plantations and introduced the plantation management systems that are still in use today.

Woven

retains the classic style of traditional wicker pieces, but with the added benefit of complete weather resistance. And because every piece is hand-woven, each item is completely unique - as individual as the person who wove it. We weave over fully welded, powder coated aluminium frames, making the furniture both light and highly resistant to corrosion.

All our woven furniture is made from only the highest quality man-made fibre. Soft to the touch, this remarkable material has many benefits including high suppleness, tear resistance, UV resistance and weather resistance. The polyethylene based, extruded and through-dyed wicker is also completely weatherproof, insensitive to differences in temperature and extremely hard wearing.

Coffee Table (HPL Top)
Brushed EP stainless steel frame with HPL table top. Upper table top surfaces fold up & out to dining height.
Accessory - 6151B HPL Base Shelf

OUTDOOR LOUNGE TECHNOLOGY
Gloster's pioneering Outdoor Lounge cushions have been conceived, designed and engineered to be highly water resistant.

The fabrics used for seat and back cushion covers is similar to a traditional PVC sling, but with the addition of 100% polypropylene yarns within the weave to offer increased comfort. An additional backing layer and fully sealed seams add to the water resistant properties of this material.

In the unlikely case that any water does pass through the outer cushion covers, the construction of the Outdoor Lounge cushions themselves - including an inner cushion liner, reticulated foam and dacron core, mesh bases and concealed Velcro seals - allows for it to drain away quickly.

However, as with any item left permanently outside and exposed to the elements, regular cleaning is recommended. We also advise furniture is covered in the Winter months if possible.

NOMAD COVERS

Nomad seating units feature a free-standing sling covered frame with a choice of quick-change, removable covers in eight outdoor fabrics. Solid colour covers use 100% acrylic fabrics, Stripe colour covers use 100% polypropylene fabrics. Soft and comfortable to the touch, these fabric covers retain their colour and strength while withstanding mildew, chlorine, atmospheric chemicals and years of exposure to sunlight. Nomad Covers however are NOT waterproof and if left outside in the rain, will become wet. They are however, easy and quick to dry - simply detach from the frame and hang up for a few hours to dry out thoroughly.

BUTTERFLY EXTENSION SYSTEM

Gloster's butterfly table extension system has all the function and attention to detail you would find on an indoor table, but re-engineered for outdoors using weather-resistant materials.

Bespoke, hand-made hinges, smooth running nylon guides and tough stainless steel fittings are combined to produce a practical and simple to use table extension system.

Easy to operate by one person, the extension leaf simply stores folded under the table top when not in use and can be quickly lifted up in one quick, clean action to provide extra table top area and seating capacity when required.

BUTTERFLY EXTENSION SYSTEM

Gløster's butterfly table extension system has all the function and attention to detail you would find on an indoor table, but re-engineered for outdoors using weather-resistant materials.

Bespoke, hand-made hinges, smooth running nylon guides and tough stainless steel fittings are combined to produce a practical and simple to use table extension system.

Easy to operate by one person, the extension leaf simply stores folded under the table top when not in use and can be quickly lifted up in one quick, clean action to provide extra table top area and seating capacity when required.

ESTATE PAINTED FINISH
Estate items are manufactured using kiln dried mahogany timber and are hand painted with multiple coats of marine grade paint to give a hard wearing and durable outdoor finish. Prior to painting the mahogany is washed to remove some of the natural red colouring from the surface. It is then painted with filling coats and final coats. Between each application the furniture is sanded to create a high gloss, glass-like finish. The paint used is manufactured by Sikkens/Akzo Nobel, a world wide renowned supplier of marine paints and lacquers.

All Estate items are designed for full outdoor use but in the knowledge they will behave outdoors as all painted wood furniture or joinery would do.

FABRIC CUSHIONS FOR CASABLANCA DEEP SEATING ITEMS
Casablanca deep seating items are available with a choice of Canvas, Charcoal, Chilli or Macaw colour, 100% acrylic fabric cushions.

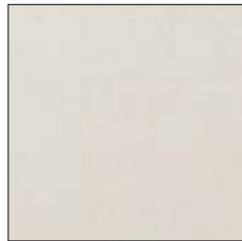

STANDARD CUSHIONS & FABRICS

Gloster cushions have been specially designed to give an added touch of opulence and comfort to our dining chairs, loungers and seating items. Cushions are tailored to fit each item of furniture perfectly and are available in a wide range of colours. Our standard fabrics are 100% solution dyed acrylic. These fabrics benefit from feeling soft and comfortable to the touch, yet also retain their colour and strength while withstanding mildew, chlorine, atmospheric chemicals and years of exposure to sunlight.

To achieve maximum enjoyment from your cushions you should of course care for them correctly. Gloster optional, deep seating and scatter cushions are not waterproof, so avoid exposure to extended rainfall. If cushions do become wet, separate the cushion filling from the cover and allow both to dry thoroughly. When not in use, take care to store cushions in a dry environment. Do not store cushions when wet.

OUTDOOR LOUNGE FABRICS

All Gloster's Outdoor Lounge collections have been conceived, designed and engineered to be highly water resistant. The fabrics used for seat and back cushion covers is similar to a traditional PVC sling, but with the addition of 100% polypropylene yarns within the weave to offer increased comfort. An additional backing layer and fully sealed seams add to the water resistant properties of this material.

Product Care

It goes without saying that outdoor furniture has to endure far harsher conditions than indoor furniture. From sub-zero temperatures in Winter to sweltering heat and high humidity in Summer, outdoor furniture needs to be able to endure everything mother nature throws at it.

At Gloster, we use only the finest materials in the manufacture of our products and you can ensure your furniture enjoys a long and trouble-free life with just a little basic maintenance every year.

Our woven, metal and sling products require only the most simple of cleaning regimes to keep them looking as good as new. Metal furniture can attract dirt and stains and therefore needs periodic cleaning with Gloster's 'Metal Cleaner' or 'Stainless Steel Cleaner & Polisher'.

Sling, outdoor lounge and woven furniture needs only an occasional clean with our special non-foaming 'Sling & Woven Cleaner' or our 'Outdoor Lounge Fabric Cleaner'.

Contrary to popular belief, teak furniture does not require any special maintenance routine or any additional protection apart from occasional cleaning. If left to age naturally outside by being exposed to light, air and rain, then the surface of the teak will gradually change to a soft, silver-grey as the pigments in the surface layer of the wood slowly start to fade away.

We recommend that you allow your teak furniture to weather naturally this way and simply clean thoroughly once or twice a year with our 'Teak Cleaner'.

To protect teak surfaces from staining and to help maintain the silver-grey patina on weathered teak, we recommend using our 'Teak Stain Protector' which repels moisture and minimizes the likelihood of stains caused by food and drinks.

If you want to retain the golden-brown colour of new teak we also offer a 'Teak Sealer'. Application of 'Teak Sealer' will not affect the strength or longevity of the furniture in any way, just its appearance. If you elect to use 'Teak Sealer' you will be embarking on a regular maintenance program as 'Teak Sealer' needs to be regularly re-applied to provide continuous protection.

All of Gloster's product care items are water-based, making them both non-toxic and environmentally friendly.

VOL 750ml
Teak Cleaner
 A70 : Teak Cleaner
 Cleans and brightens weathered teak in one, simple step. Each bottle is supplied complete with a special applicator pad.

VOL 1 litre
Teak Protector
 A72 : Teak Protector
